Results-driven software engineer and aspiring Cybersecurity specialist with a B.S. from Western Governors University, currently working on a second degree in Cybersecurity and Information Assurance. Skilled in designing and implementing scalable software solutions using modern technologies and methodologies. Recognized for strong problem-solving abilities, effective teamwork, and a commitment to delivering high-quality code.

TECHNICAL SKILLS

Programming Languages	Java, Python, C++, TypeScript, JavaScript, Kotlin
Web Technology	Next.js, Firebase, Supabase, Spring Boot, TailwindCSS, ShadCN
Operating Systems	Windows 11, Linux (Arch, Ubuntu, Kali), macOS
Security Tools	Nmap, Wireshark
Certificates	CompTIA A+, Network+, Security+, CySA+, ITILv4, AWS Cloud Practitioner

EDUCATION

Bachelor of Science in Cyber Security and Information Assurance, Western Governors University *Expected July 2026*

- Relevant Coursework: Networking, Security Fundamentals, Risk Management, Cryptography, Ethical Hacking, Incident Response, Digital Forensics

Bachelor of Science in Software Engineering, Western Governors University *May. 2025*

- Relevant Coursework: Cloud Computing, Distributed Systems, Data Structures & Algorithms, Software Architecture, Database Management, Cybersecurity Fundamentals, DevOps Practices

WORK EXPERIENCE

Barista & IT Support Assistant, Black Rifle Coffee Company | Harker Heights, TX *Feb. 2023 – Present*

- Provided frontline IT support for point-of-sale systems, Wi-Fi, and printers, reducing downtime during peak hours.
- Ensured smooth daily operations by resolving technical problems quickly and effectively.
- Delivered excellent customer service while preparing specialty beverages and handling transactions in a fast-paced environment.

Freelance Software Developer | Remote *Mar. 2020 – Aug. 2023*

- Built Minecraft plugins in Java (Spigot/Bukkit) with custom gameplay and economy systems.
- Developed Discord bots in TypeScript/Python for multiple communities up to 15k+ members.
- Created web dashboards using Express.js, React, and Firebase for easy configuration.
- Delivered updates and support to keep projects stable, automated, and user-friendly.

ACADEMIC PROJECTS

Recipe Viewer & Ingredient Inventory Management System *Apr. 2025 – May 2025*

- Designed and built a full-stack application to track recipes, manage ingredient inventory, and reduce food waste.
- Implemented CRUD functionality for recipes and ingredients with real-time inventory updates.
- Developed a user-friendly interface for recipe browsing and ingredient tracking.
- Applied secure coding practices and software engineering principles as part of capstone requirements.

OTHER RELEVANT EXPERIENCE

- Participated in UIL Events during High School for Computer Science in 2019 and 2023
- Participated in the Robotics Club, competing in GWAMA with First Robotics in 2019
